

JUST UP - Swivel chair

JUST UP is an armchair made of high quality materials. The solid construction as well as the used mechanisms and amenities make long-term desk work much more pleasant. The seat is soft, well profiled but also very comfortable. The advantage of this model is the 2-sided upholstered backrest. Its large dimensions ensure stabilization and support of the spine. It should be emphasized that JUST UP is available with two variants of mechanisms to choose from: synchro and synchro with the built-in seat slider plate. This element additionally affects the ergonomics of the seat. Depth adjustment has a positive impact on our comfort and well-being.

An interesting solution and gadget at the same time is the option of an upholstered headrest with a hanger. Undoubtedly, such an element is useful in every office. Therefore JUST UP combines not only comfort, design but also practicality, proving that the chair is a great place for clothes.
