

GLOBAL[®]

PROFESSIONAL SEATING

Joy of work - Joy of sitting - Joy of life

Our products conform to current standards and international standards

General standard is EN 1335

(based on 8 hours of daily use for persons up to 110 kg body weight)

Global Stole is ISO certified for environment, quality and management system; ISO 9001:2015 og ISO 14001:2015

In addition, we have converted 100% of our electricity to renewable energy and CO2-neutral energy from Danish wind power.

Supplier to the professional user

since 1973

Quality

Our chairs and stools are produced in Denmark at our own factory in Hvorslev in Central Jutland. This means that we can guarantee the quality of our products 100%. Our focus on quality and usable design excels in our products, by being well thought out, made of high-quality materials and with a long service life.

Ergonomics

Different work situations require different seating options to create best possible efficiency and create less strain on the body.

Flexibility

With committed staff and production from start to finish, we can meet special customer requests regarding castor types, seat heights, fabric types and colors etc.

DANISH PRODUCED

With respect for integrity and detail, Global Stole produces ergonomic work chairs for the professional user. We strive to be the best at customer satisfaction through flexible operation and fast delivery.

3D and MR

Via the QR codes in the catalogue you can see the chairs in 3D and in Mixed Reality, where you can place the selected chair in your reality, for example in your workplace.

Global Stole deliver experience-oriented ergonomics, which provide a top working environment and efficiency. Joy is such a fundamental and individual sense, just like chairs.

The chair must suit the person and the environment

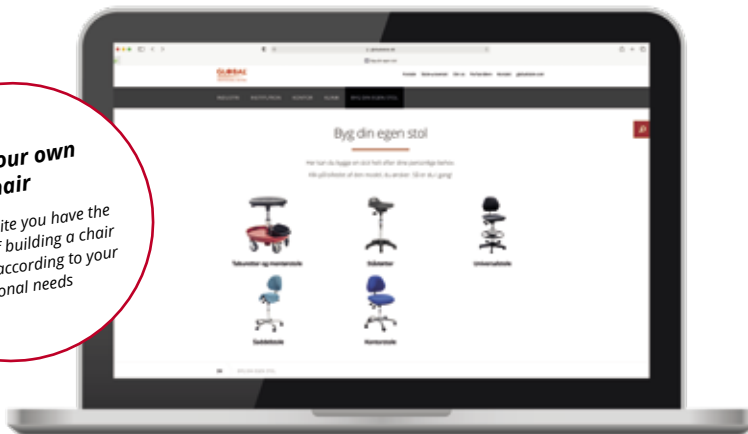

Whether you use your chair in the workshop, in the office or in the kindergarten...

Whether you sit for several hours or just a moment...

Your Global chair, fits the environment you are in and is easy to adjust, so you always sit ergonomically correct

Build your own chair

On our website you have the possibility of building a chair completely according to your personal needs

Active seating

Modern research shows that there are health effects associated with sitting statically for extended periods. The body is intended for movement and benefits from physical activity. This movement can be difficult to achieve in many jobs, but fortunately Global Stole can help you.

Active Seating from Global Stole prevents the risk of sitting statically and improves the dynamic sitting position. With a dynamic sitting position, solid foot contact and open hip joint, you sit upright, and you activate your core. Your breathing will be easier, you prevent neck problems, and you improve the blood flow in your body.

In occupational therapy, people talk about the "Double-minded attention". So, to have just as much focus on your body, as on your work task. With one of the Active Seating chairs, you do not have to concentrate on sitting properly, the chairs will do that for you, and you can put all your focus on your work tasks.

INDUSTRY

Work chairs and general seating solutions, which
can be used anywhere

The Global Stole industrial chairs are easy to adjust in both height, seat and backrest angle, so you can quickly find yourself in the next working position. At the same time, you have the opportunity to customize your chair to your taste, e.g. in the choice of castor type, base or color.

Roller stools

Global Stoles roller stools are designed to provide good seating comfort and are practical and strong in the rougher environments. The roller stools can be adjusted to a very low seat height, and they have solid castors. They can be equipped with trays, toolboxes and different seat types. If you choose e.g. a polyurethane seat for your roller stool it is resistant to a number of fluids and chemicals and at the same time, it is easy to clean.

Sigma 400P

Item no.: 20 3 001 2 000

Seating height: 37-50 cm

Alternative seating heights: 46-65 · 32-39 cm

Sit Stands

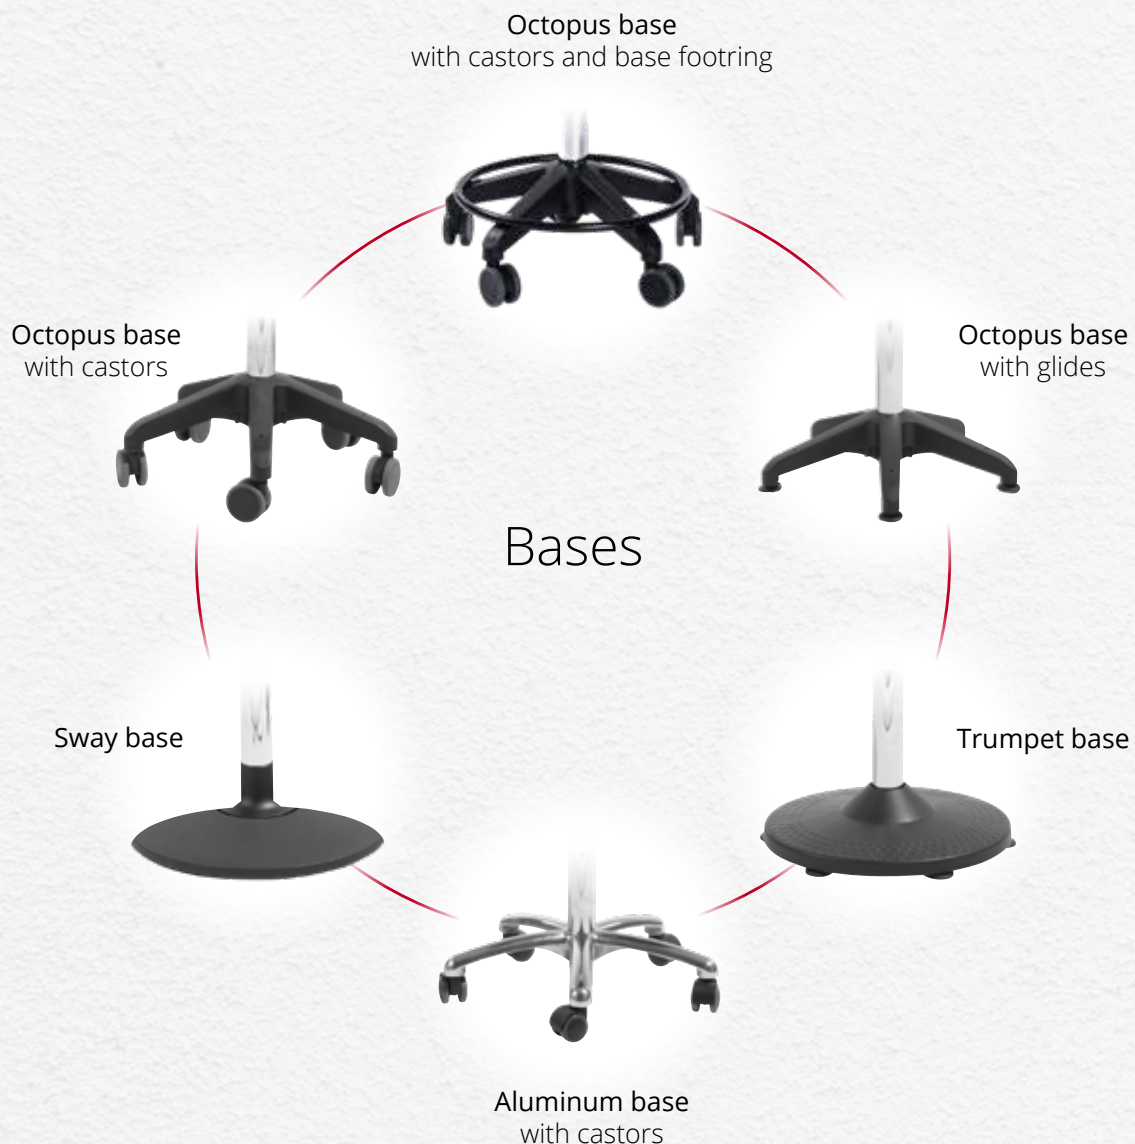

Global Stole sit stands are practical stools, relieving you in your daily work if you have to stand up a lot or if you are able to sit only briefly during work processes.

The seats have a large seating area with lumbar support of molded polyurethane, which provides a good seating comfort and is practical and strong even in the roughest environments. Polyurethane also distinguishes itself by being tough against many types of liquids and chemicals while being easy to clean.

The sit stands are available with the EASY SEAT mechanism.

The seat-angle is adjusted quickly and easily between 14° forward and 3° backward and allowing for height adjustment.

All our chairs can be combined with different bases and heights of gas springs, so you have the opportunity to find the right seating solution.

Omega

The seat of polyurethane foam provides good seating comfort and is practical and strong - even in the rougher environments.

Omega - Alu50

Item no.: 40 2 004 2 000

Seat: 36 x 40 cm

Seating height: 51-70 cm

Alternative seating heights:
58-84 · 42-55 cm

Sway base, 500 mm

I really like the chair as it is very comfortable to sit on. The constant movements make you aware of your posture. I have a height adjustable desk and the change between using Space as the stool or as sit stand is really good.

- Peter Bragh, Service Advisor, Sølvsten Biler Viborg

Fixed sit stands

These variants have a collapsible frame with infinite adjustment of the seat height and adjustable seat angle.

Available in either black powder-coated frame or stainless steel frame, with seat and backrest in either plastic or upholstered with fabric or imitation leather.

A footrest can be mounted on the frame.

Work chairs

The design is well thought out, so the chairs are user-friendly and have a solid and reliable construction

The work chairs are made of the highest quality materials, which provide long durability - also when the environment is demanding. The chairs are excellent in all environments e.g. the production hall, the workshop, the checkout line, the reception, the kitchen and many other places.

The work chairs are available with seat and backrest made of:

Solid:	Moulded, schockproof plastic
Classic:	Moulded polyurethane foam
Comfort:	Moulded polyurethane foam
Prestige:	Moulded polyurethane foam
Premium:	Moulded super-soft polyurethane foam
Aktiv:	Heavy-duty upholstery in fabric or imitation leather

When choosing a chair, it is important that it is comfortable to sit on as well as easy to adjust. We have developed the unique EUROMATIC seating mechanism, which is installed on all our work chairs.

Euromatic: Provides an easy and infinite adjustment of seat and back. The user operates the chair using three handles, which are positioned beneath the seat. If the user releases the left handle, they can use their body weight and adjust the angle of the seat between 12° forward and 3° backward. The position is locked once the user lets go of the handle. The same applies to the backrest, which can be adjusted by means of the right handle 16° forward and 6° backward. The seat height is adjusted using the third handle.

Solid

A practical and strong work chair in molded, shockproof plastic, which is suitable for welding jobs or other extreme surroundings.

Solid - High

With glides and footring

Item no.: 50 1 0 1 0 1

INSTITUTION

Prepared with your work situation in mind

Global Stole offers a large range of chairs and stools that are suitable for use in institutions such as day- and residential institutions, educational institutions, technical institutes etc.

They can all be adjusted individually and supports different ergonomic needs. The possibility of individual adaptation of for example seat height and material selection provide additional benefits in special environments, such as in kindergartens where a low seat height is required.

*Get on eye level
with the children*

Stools

Micro

The Micro stool is our absolute all-rounder, not least in the institutional world, where employees often have to be at the child's height in order to do their job. The chair is lightweight and can be quickly moved. The seat is comfortably soft and is thus optimal, regardless of whether you are only sitting for a moment when the children's shoes are to be tied, or longer when reading stories.

Backrest, adjustable, upholstered

The image shows two adjustable stools on a colorful children's rug. The rug features a cartoonish landscape with a blue river, green grass, yellow paths, and various plants and rocks. One stool is in the foreground, and another is in the background. Both stools have a black five-star base with casters and a circular seat. The seat of the foreground stool is light grey, while the seat of the background stool is dark blue. A white text box with a red double-slash icon is overlaid on the left side of the image.

Flexible and functional stool, so you can easily get around the room and reach child height without straining your back.

The Global stool works optimally in nurseries and kindergartens. Simply adjust the height according to you and the children you are assisting.

– Susan Rosgaard Andersen, educator in Rødkærsbro Børnehus, Denmark on Sigma 400P

Other professionals who tested the Sigma 400P in their everyday concluded the following:

- Less back pain
- Flexibility in height adjustment
- Comfortable and practical
- Movement due to the castors

Saturn

Vary your sitting posture during the day with this ergonomic stool. Saturn has a unique design that makes it optimal for those who want to sit more dynamically and at the same time relieve the body and make it easy to find a comfortable and ergonomic posture.

The stool is equipped with a 360° rotating support that can be used as a backrest or armrest depending on how you choose to sit on the chair. The seat is upholstered for optimal seating comfort and has a ring release for adjusting the seat height.

Pilates Air Seat

The idea of Pilates Air Seat from Global Stole has arisen within the sports world - to combine activity and rest in a thoughtful way, so as to ensure the best possible conditions for a top performance.

In other words, getting in balance with your body and your work.

Pilates Air Seat has the same effect as the Pilates ball. It requires the body to "concentrate on sitting", thus strengthening and maintaining the muscle groups in the back and hip actively while sitting. Upholstered in fabric or imitation leather. The seat has a ring release for height adjustment of the stool.

Students spend many hours on their chair, therefore, it is important that they have the ability to customize the chair, to achieve good ergonomics.

Ergonomically correct chairs that can be adjusted to the height of the student is of great importance for learning. Healthy body posture helps to increase well-being and makes it easier to maintain concentration.

Student chairs

Nest

Nest is our height-adjustable student chair. It has a comfortable and strong seat which provides good support and is easy to clean. It is easy to adjust the seat height using a handle under the seat. It allows the user to always have a comfortable working position. The chair is available in both a medium and a low model, to ensure that you find just the right seat height. We recommend castors for Nest, so the chair is easy to move around.

Sit sustainably and ergonomically correct with this seat, manufactured of 100% recycled plastic.

Mind

Along with our vision that school students have to be well seated, we also want to help make their future greener. This is achieved with the Mind chair.

Mind takes care of our students

The students can easily adjust the seat height and thereby achieve the right body position regardless of age and height. It helps to increase well-being and make it easier to maintain concentration. Mind is durable, lightweight, is easy to clean and has a smart hook for outerwear and bags.

Mind takes care of our future

With a seat molded from 100% recycled plastic, upcycles 1.9 kg. waste plastic and is 100% recyclable, Mind helps to ensure that our total waste does not increase over time and that we limit our consumption of raw materials. Designed to be separated and continuously recycled.

Saddle chairs

For institutes, we are recommended two different sizes and designs:

- Mini:** The small saddle
Echo: The two-part saddle, with adjustable width

Using a saddle chair, you get an ergonomically correct posture and straight back, so you can sit for a longer period without feeling tired in the body. The saddles are upholstered with cold foam and fabric or imitation leather in many colors.

Easy seat: The seat angle is quickly and easily adjusted 14 ° forward and 3 ° back.

Flexmatic: The Flexmatic seat mechanism automatically adjusts to the optimal ergonomic seating position with movement, dynamic seating position and open joints.

Mini - Sway

Item no.: 84 2 2680

Seating height: 53-72 cm

Alternative seating height, low:
44-57 cm

Saddle: 38x29x23 cm

Swaybase, 500 mm

Mini

Mini is the small saddle chair, which is extra soft and narrow. It is upholstered with cold foam and fabric or imitation leather.

Mini - Alu50

Item no.: 46 2 0688 1 2

Seating height: 58-77 cm

Alternative seating height, low: 49-62 cm

Saddle: 38x29x23 cm

Aluminum base, 500 mm

Easy rolling castors, 50 mm

Echo

The Echo saddle chair has a two-part seat, that relieves pressure on the spine and pelvis. This ergonomic saddle chair helps you to sit in a correct and relaxed way. You are sitting in a so-called equestrian position, that keeps the spine in its natural curve, which decreases tension in neck, shoulders, and lower back. The saddle chair also improves blood circulation in feet and legs as it opens the angle of the hips and knees.

Echo - Alu50

The saddle is upholstered with cold foam and black genuine leather.

Item no.: 46 2 0230 1 2

Seating height: 54-73 cm

Alternative seating height, low: 45-58 cm

Saddle: 400-440 x 380 mm

Aluminum base, 500 mm

Easy rolling castors, 50 mm

Kindergarten teacher chair

A work chair for you who need to sit low, to be at eye level with small children. Practical and comfortable seat and backrest upholstered with cold foam and imitation leather, which is very easy to clean. The chair has Econ seat mechanism making it easy and quick to adjust the seat and backrest angles and the seating height.

Luna

Item no.: 68 9 087 3 2 0

Seating height: 33-45 cm

Seat: 44 x 44 cm

Backrest: 37 x 33 cm

Seat adjustment: 6° forward and 2° backward

Backrest adjustment: 12° forward and 11° backward

Plastic base, 600 mm

Easy rolling castors, 50 mm

Table / bench set

The flexible way to get extra seat and table space. Perfectly suited for e.g., schools, hospitals or other institutions where corridors normally do not leave much space, but where this table with benches can be folded out when required. Mounted with a high-quality gas spring for smooth operation and prepared for a safety lock that prevents the table from unfolding unexpectedly.

Solid frame of powder-painted steel (RAL9006), and strong 25 mm thick laminated MDF-boards with rounded ends.

Lockable

Item no.: 801872

Total width: 1345 mm
Table top: 1100 x 600 mm
Seat: 1100 x 300 mm
Seating height: 450 mm
Table height: 730 mm

OFFICE

The series includes both traditional office chairs,
saddle chairs and stools

Global Stole's ergonomic seating furniture is included in various ways to set your body in motion, improve your posture, strengthen your back and abdominal muscles, and increase blood circulation. In addition, this has a positive impact on your energy levels and makes it easier to focus and concentrate, which in turn contributes to increased efficiency and productivity.

Saddle chairs

For the office, we offer different sizes and designs:

- Mini:** The small saddle
- Dalton:** The all-round model
- Pinto:** Extra soft seat
- Echo:** The two-part saddle with adjustable width

A saddle chair provides you with an ergonomically correct posture and straight back, so you can sit for a long time without feeling tired in your body. The saddles are upholstered with cold foam and fabric or imitation leather in many colors.

Using Global Stole's seat mechanisms, the seat is adjusted quickly and easily.

Easy seat: Infinite adjustment: seat angle 14 ° forwards and 3 ° backwards. Not compatible with backrest.

Euromatic: Infinite adjustment: seat angle 12 ° forwards and 3 ° backwards and backrest angle 16 ° forward and 6 ° backward.

Flexmatic: The Flexmatic seat mechanism automatically adjusts to the optimal ergonomic seating position with movement, dynamic seating position and open joints.

Aluminum base, 500 mm

Easy rolling castors, 50 mm

The seat is soft and comfortable. The flexible seat provides excellent movement in the lower back and pelvic, which is a great advantage if you often need to be seated for a longer period of time.

This is exactly how you avoid hip, lower back, and pelvic problems, which I treat daily in the clinic.

- Brian Nørgård, Posturologist, cranio-sacral therapist and acupuncturist

Dalton - Sway

All our saddle chairs are also available with the sway base on which you sit and at the same time keep your body active. The base is flexible, which means that micro-movements strengthen your body and keep it going. With the Flexmatic seat mechanism, you achieve an optimal ergonomic and dynamic seating position with the possibility of sitting with open joints.

Item no.: 84 2 2780

Seating height: 53-72 cm

Alternative seating heights: 60-86 · 44-57 cm

Saddle: 41 x 32 x 29 cm

Sway base, 500 mm

Stools

Tria and Tetra

The triangular and square seat allows for new seating positions. The seats are height-adjustable and fits all Global Stoles heights with gas springs and bases. The seat can rotate and is very soft due to the extra padding. Seat height is easily adjusted with a strap of genuine leather.

Tria - Sway

Seat: 37 x 37 x 37 x 5 cm

Sway base, 500 mm

Tetra - Alu50

Item no.: 40 2 864 2 000

Seating height: 50-69 cm

Alternative seating heights: 41-54 · 36-43 cm

Seat: 31 x 31 x 5 cm

Aluminum base, 500 mm

Easy rolling castors, 50 mm

Saturn

Vary your sitting posture during the day with this ergonomic stool. Saturn has a unique design that makes it optimal for those who want to sit more dynamically and at the same time relieve the body and make it easy to find a comfortable and ergonomic posture.

The stool is equipped with a 360° rotating support that can be used as a backrest or armrest, depending on how you choose to sit on the chair. The seat is upholstered for optimal seating comfort and has a ring release for adjusting the seat height.

Saturn Plus - Alu61

In addition to the 360 ° rotation of the back and armrests, it also adjusts 9.5 cm. in the height.

Item no.: 43 2 587 2 2

Seating height: 47-66 cm

Alternative seating height, low: 38-51 cm

Seat diameter: 36 cm

Aluminum base, 610 mm

Easy rolling castors, 50 mm

Saturn - Alu61

Item no.: 43 2 445 2 2

Seating height: 47-66 cm

Alternative seating height, low: 38-51 cm

Seat diameter: 36 cm

Aluminum base, 610 mm

Easy rolling castors, 50 mm

Oxford

The Oxford chair helps you sit up straight and use your body correctly. The chair is developed with focus on the body's anatomy and physiology. A correct sitting position helps you through a long day's work.

Oxford also offers the opportunity to sit upside down and use the narrow backrest as support for chest and abdomen. It relieves your body and helps to activate your abdominal muscles, inner thighs and buttocks and you get a natural movement in the hip joint, so the spine comes into balance.

Oxford

Item no.: 82 2 046 2 2

Seating height: 54-73 cm

Alternative seating height: 45-58 cm

Seat diameter: 36 cm

Backrest: 27 x 23 cm

Aluminum base, 610 mm

Easy rolling castors, 50 mm

PIVO

PIVO is designed for you to sit while keeping your body active. The base of the chair is flexible, which means that micro-movements strengthen your body and keeps it moving.

PIVO has a wide height adjustment from sitting to standing position, and you can therefore use it in many places, as both sit-stand and a stool.

With the flat and stable base you can sit relaxed and secure, so you can enjoy comfort along with the healthy movement you naturally gain from the flexible joint.

PIVO combines functionality and fine details. The seat can rotate and is easily accessible, and the seat height is easily adjusted with a strap of genuine leather.

98% recycled polyester

Stool with micro-movements

PIVO

Item no.: 81 068187

Seating height: 55-81 cm

Seat diameter: 30 cm

Pivo base, 400 mm

The stool is upholstered with CURA fabric, which is Oeko-tex certified and has the EU Ecolabel. The CURA fabric is modern and very durable, and the fabric is made from 98% recycled polyester.

Pilates Air Seat

The idea of Pilates Air Seat from Global Stole has arisen within the sports world - to combine activity and rest in a thoughtful way, so as to ensure the best possible conditions for a top performance.

In other words, getting in balance with your body and your work.

Pilates Air Seat has the same effect as the Pilates ball. It requires the body to "concentrate on sitting", thus strengthening and maintaining the muscle groups in the back and hip actively while sitting.

Pilates Air Seat - Alu50

Air cushion seat upholstered in fabric or imitation leather. The seat has a ring release for height adjustment of the stool.

Item no.: 45 2 245 1 2

Seating height: 52-71 cm

Alternative seating height, low: 43-56 cm

Seat diameter: 33 cm

Aluminum base, 500 mm

Easy rolling castors, 2 with brakes, 60 mm

Pilates Air Seat - Sway

Pilates Sway has a double active seating effect. The air cushion in the Pilates seat strengthens and maintains the muscle groups in the back and lumbar actively. While being flexible the Sway base allows you constant movement while sitting.

Item no.: 86 2 246

Seating height: 51-70 cm

Alternative seating height, low: 42-55 cm

Seat diameter: 33 cm

Sway base, 500 mm

Watch the
video about
Pilates Air Seat

It has been marvelous to discover the huge difference the Pilates Air seat has made in my everyday life. After a disc herniation, it is challenging for me to sit, and I often change positions.

When using the Pilates Air Seat, I activate my pelvic floor and legs while being in motion. I have used it as part of my training for posture and coordination.

I have previously learned that when I sit in wrong positions or when standing without support, I easily come to compensate in other joints, tense up and thereby create inappropriate tension in my back, shoulders, and neck.

– Evy Elgaard Lüneborg, Psychomotor Therapist

Office

Comfortable office chair with a soft upholstered seat and back for optimal seating comfort.

The Global EUROMATIC seat mechanism provides easy infinite adjustment of seat and backrest. This means that your back is always in contact with the backrest itself. It also makes it easier to open the angle of the hip joint to facilitate blood circulation.

Office - Alu61

CLINIC

Suitable for work situations where ergonomics and mobility are important

The chairs are used in the care sector and clinics where there is a need to be able to move and adjust the chairs quickly. If you, for example, choose a saddle chair as a clinic chair, you have the opportunity to keep your hands free while at the same time moving your chair around with your feet.

Relieve your pelvic and hip joints with an ergonomic chair

Stools

Careline Beta

The CL Beta stool is upholstered in cold foam and fabric or imitation leather, so you are guaranteed optimal seating comfort. The height is easily adjusted by using the ring release under the seat.

Saddle chairs

In our range for clinics we offer different sizes and designs:

- Echo:** The two-part saddle with adjustable width
- Mini:** The small saddle
- Dalton:** The all-round model
- Jolly:** A v-cut saddle front that minimizes annoying pressure

A saddle chair helps you maintain an ergonomically good posture with a straight back. You use your legs naturally to move around with the chair while you sit on it, so you can easily change position and have your hands and upper body free for work.

The saddles are upholstered with cold foam and fabric or imitation leather in many colors. Using Global Stole's seat mechanisms, the seat is adjusted quickly and easily.

Easy seat: Infinite adjustment: seat angle 14 ° forwards and 3 ° backwards. Not compatible with backrest.

Euromatic: Infinite adjustment: seat angle 12 ° forwards and 3 ° backwards and backrest angle 16 ° forward and 6 ° backward.

Flexmatic: The Flexmatic seat mechanism automatically adjusts to the optimal ergonomic seating position with movement, dynamic seating position and open joints.

Echo

The Echo saddle chair has a two-part seat, that relieves pressure on the spine and pelvis. This ergonomic saddle chair helps you sit in a correct and relaxed way. You are sitting in a so-called equestrian position, that keeps the spine in its natural curve, which decreases tension in your neck, shoulders, and lower back. The saddle chair also improves blood circulation in feet and legs as it opens the angle of the hips and knees.

Echo - Alu50

The saddle is upholstered with cold foam black genuine leather.

Item no.: 46 2 0230 1 2

Seating height: 54-73 cm

Alternative seating height, low: 45-58 cm

Plastic base	Base in shock-proof plastic with a diameter of 600 mm.
Steel base	Solid base in steel with a diameter of 560 mm.
Sway	Plastic base with a diameter of 500 mm and flexible joint to achieve micro-movements

See pictures of the bases at: <https://www.globalstole.com/the-universe-of-chairs/knowledge/global-bases/>

Gas springs

Our gas springs have a tolerance of +/- 2 cm. The actual seat height will depend on the base and which seat you have chosen for your particular chair.

Office low	Variation of 13 cm. (Only for Octopus and Alu base with castors)	Item no.: 621021
Extra low	Variation of 7 cm.	Item no.: 621005
Low	Variation of 13 cm.	Item no.: 621006
Medium	Variation of 19 cm.	Item no.: 621007
High	Variation of 26 cm.	Item no.: 621008
Foot operated height adjustment	Variation of 19 cm. Most of our stools and chairs are also available with foot-operated height adjustment. Particularly practical for client consultations, where both hands are in use.	Item no.: 621040

Mechanisms

Easy Seat	<p>The seat is adjusted quickly and easily using a gas spring while you are seated on the chair.</p> <p>Infinite adjustment: Seat angle 14 ° forward and 3 ° backward</p> <p>Not compatible with backrest.</p>
Euromatic	<p>The seat and backrest angle of the chair is adjusted quickly and easily using two small gas springs while seated on the chair.</p> <p>Infinite adjustment: Seat angle 12 ° forwards and 3 ° backwards</p> <p>Backrest angle: 16 ° forward and 6 ° backward</p>
Flexmatic	<p>Automatically adjusts to the optimal ergonomic seating position.</p> <p>Corrects the seat angle to the center of gravity so the user is constantly sitting comfortably and dynamically.</p> <p>Stimulates the muscles within the natural degrees of freedom of the spine.</p> <p>Not compatible with backrest.</p>

Seats

Polyurethan seat	Provides good seating comfort and is practical and strong in the rougher environments
Upholstered seat	Upholstered with cold foam and fabric or imitation leather, which is comfortable and provides optimal seating comfort
Lacquered plywood	Strong, stylish and easy to clean
Plastic seat	Strong and easy to clean and suitable in extreme conditions

See pictures of the seats at: <https://www.globalstole.com/the-universe-of-chairs/knowledge/global-seats/>

Saddle chairs

There are many benefits to using a saddle chair.

The sitting position means that the back retains its natural curve on the lower part, thereby reducing the tension throughout the back.

Blood circulation in the body is improved because it is possible to sit with relatively “open” angles on the hips and knee joints. This sitting position prevents squeezing and tight, short muscles as you get the movement in the large muscle groups in the legs.

Mini	The small saddle
Dalton	The classic cowboy saddle
Pinto	The extra soft saddle
Jolly	The V-cut saddle front
Gamma	The comfortable, wide saddle
Echo	The two-part saddle, with adjustable width

See pictures of the saddles at: <https://www.globalstole.com/the-universe-of-chairs/knowledge/global-Saddle chairs/>

Mounting

The chairs are easy to mount.

Scan the QR code on packaging and product or find the mounting instructions on our website:
